Notepad++ source code editor

• I recommend Notepad++ to edit HTML, CSS, JavaScript, or PHP code on Windows
  • Syntax-aware color coding
  • Edit multiple buffers at one time
  • Regular expression search/replace

• Get it from
  http://notepad-plus-plus.org/
WebEdit for Notepad++

Plugin that provides many shortcuts and helps for editing HTML.

Just open the Notepad++ Plugin Manager, select it, and click Install.
